Contents Volume 54, 1992

Soils on igneous and metavolcanic rocks in the Sonoran Desert of Baja California, Mexico
R.C. Graham (Riverside, CA, USA) and E. Franco-Vizcaíno
(Ensenada, Baja California, Mexico) 1
Effect of development and cultivation on physical properties of peat soils in New Zealand
C.D.A. McLay, R.F. Allbrook and K. Thompson (Hamilton, New Zealand) 23
Spacial prediction and mapping of continuous soil classes
A.B. McBratney (Sydney, NSW, Australia), J.D. De Gruijter and D.J. Brus (Wageningen, The Netherlands) 39
Genesis of selected sandy soils in Alberta, Canada as revealed by microfabric, leachate- and soil composition
J.M. Arocena, S. Pawluk and M.J. Dudas (Edmonton, Alta., Canada) 65
Mineral distribution in soils formed in the Indiana Dunes, USA
K.B. Esser (Ås, Norway), J.G. Bockheim and P.A. Helmke (Madison, WI, USA) 91
Computer-captured expert knowledge to evaluate possibilities for injection of slurry from animal manure in the Netherlands
H.A.J. van Lanen and F.A. Wopereis (Wageningen, The Netherlands) 107
Distribution and composition of salt in sand dunes overlying salt flats of coastal desert, Saudi Arabia
M.H. Al-Awajy, M.S. Heakal, A. Al-Asheikh and M. Reda (Riyadh, Saudi Arabia) 125
Soil humus characteristics in virgin and cleared areas of the Paraná river basin in Brazil
V.M. Nascimento (Ilha Solteira, SP, Brazil), G. Almendros (Madrid, Spain) and F.M. Fernandes (Ilha Solteira, SP, Brazil) 137
The influence of organic matter addition by caulescent Andean rosettes on surficial soil properties
F.L. Pérez (Austin, TX, USA) 151
Electrokinetic properties of Ferrasols in China in relation to pedogenic development
H. Zhang and X.-N. Zhang (Nanjing, China) 173
Pedogenic properties of white clay soils of the Three River Plain, Heilongjiang Province, P.R. China
B. Xing and M.J. Dudas (Edmonton, Alta., Canada) 189
An assessment of the success of a geomorphologically based reconaissance soil survey in eastern Zambia
D.B. Dalal-Clayton and D.A. Robinson (Brighton, UK) 213
Influence of organic matter on aggregation in Oxisols rich in gibbsite or in goethite. I. Structures: the fractal approach
F. Bartoli, R. Philippy and G. Burtin (Vandoeuvre-les-Nancy, France) 231
Influence of organic matter on aggregation in Oxisols rich in gibbsite or in goethite. II. Clay dispersion, aggregate strength and water-stability
F. Bartoli, G. Burtin (Vandoeuvre-les-Nancy, France) and J. Guerif (Monfavet, France) 259
Effect of pH and background electrolyte on P sorption by variable charge soils
M.T. Pardo, M.E. Guadalix and M.T. Garcia-Gonzalez (Madrid, Spain) 275
Relationship of K forms and release characteristics with clay mineralogy
N.S. Bhonsle, S.K. Pal and G.S. Sekhon (Gurgaon, Haryana, India) 285
Characterization of organic matter in particle-size fractions of Vertisols
G.G. Ristori, E. Sparvoli (Firenze, Italy), M. de Nobili (Udine, Italy) and L.P. D'Acqui (Firenze, Italy) 295
Sand-sized aggregates in Andosols and their role in P retention
M. Yoshida (Chikugo, Fukuoka, Japan) 307
